MEDICAL TRAINING PROGRAM IN HAITI

OUR GOAL IS TO CHANGE THE HEALTH PARADIGM IN HAITI ONE LIFE AT A TIME

We are an all volunteer, non faith-based, non-profit organization made up of doctors, ARNPs, PAs, nurses, paramedics, and community organizers. We are committed to changing the healthcare paradigm in Haiti toward a focus on primary care, emergency response training, and community education. We raise and distribute funds for educating Haitian healthcare professionals on preventative care and emergency training, providing Basic Life Support and Advanced Cardiac Life Support classes, and for distributing much needed medical equipment in rural Haiti.

IRS Status:

501(c)(3) Non-Profit

Date of Incorporation:

March 30, 2017

2019 Board Members:

Kissinger Goldman, DO.MBA,
Co-President, Co-Founder, Chief Strategist

Jennifer Goldman, DO, Co-President,
Co-Founder

John Voltaire, Treasurer

Joanne Cancelmo, CPA, Vice-Treasurer

Marie Evelyne Moise, MD, L'Hopital
Bienfaisance Pignon Liason

Catherine Voltaire, Training Coordinator
Ultrasound

Jeff Rubinoff, Donation Coordinator
Ultrasound Machine

Susan F. Bayles, Director of Development

“ WHOEVER SAVES A LIFE, IT IS CONSIDERED AS IF THEY SAVED AN ENTIRE WORLD. ”

Education

With your help, we can continue - and expand - our life-saving work.

Each year, Haitian medical students and nursing students travel long distances to learn with us. Their passion and excitement for learning not only fuels our mission, but ensures that the work we do will be integrated in the fabric of healthcare in Haiti. In fact, many of the medical and nursing students we trained are now teaching others and providing the day-to-day quality healthcare relied on by so many. With your support, we can reach even more people, provide more training, and bring more supplies.

Primary Care Haiti distributes donated medical equipment and educates Haitian doctors and nurses working in rural towns. We concentrate on preventative medicine, specifically physical exam skill, cervical cancer screening and the management of chronic diseases like high blood pressure. We also teach rapid-response skills needed for Haitian healthcare professionals to be ready for any emergency.

Support Our Work

Every donation helps change the healthcare trajectory of a Haitian family for generations. Every donation helps educate Haitian medical providers and provides critical medical equipment such as defibrillators, EKG machines, and technology to detect and treat a range of conditions. **Help us provide critical medical equipment and training to healthcare systems outside the capital of Haiti.**

Our 2019 Accomplishments

Our organization is focused on educating Haitian physicians, nurses, and other medical professionals on the skills necessary to prevent disease and respond to emergencies around the country. Thanks to your donations, we accomplished the following:

Another phenomenal Primary Care Haiti training trip to Haiti! We worked at L'Hospital Immaculee Conception in Les Cayes in the South of Haiti.

Training Mission Highlights:

- Emergency Care Course
- Ultrasound Course
- Cervical Cancer Diagnosis and Treatment screening using the WHO recommended "see and treat" method (thanks to the colposcope from MobileODT)
- Pharmacy Course
- IT Training: Adult and pediatric neonatal resuscitation techniques

Training Session Summary:

- Emergency Courses: Triage, BLS (Basic Life Support), ACLS (Advanced Cardiac Life Support), PALS (Pediatric Advance Life Support), Mass Casualty Management
- Ultrasound Courses: Obstetrics & Gynecology, Echocardiography, Thyroid, Abdomen (Gallbladder, Pancreas, Liver, Kidneys, Aorta, Spleen), Upper & Lower Extremity Venous and Arterial

Patients Treated:

More than 500 patients screened for cervical cancer.

3 diagnostic ultrasounds performed.

Thermocoagulation performed on patients who screened positive for cervical cancer.

Attendees:

More than 290 Haitian physicians, nurses, midwives, and nursing students from 7 regions of Haiti!

Extra training provided to representative from HAS who would be in charge of training other healthcare providers who were not present at our training sessions.

This trip was dedicated to the memory of **Dr Michaele Gedeon, Former Minister of Health of Haiti**, who dedicated her life to improving health care in Haiti. One of Dr Gedeon's goals was to expand the work of Primary Care Haiti to the south of the country and to train more health care providers in emergency response. We are proud to have accomplished her goal and we look forward to continuing our training trips in the future.

Financials

Every single donation helps change the health-care trajectory of a Haitian family for generations. Every donation helps educate Haitian medical providers and provides critical medical equipment such as defibrillators, EKG machines, and technology to detect and treat cervical cancer

Each year, Haitian medical students and nursing students travel long distances to enhance their medical training in the Haitian countryside. Their passion and excitement for learning not only fuels our mission, but ensures that the work we do will be integrated in the fabric of healthcare in Haiti.

In fact, many of the students we trained are now the ones teaching and training the next generation and providing the day-to-day quality healthcare that so many rely on. Our work saves lives, and thanks to your support, we can reach more people, provide more training, and bring more supplies.

“ *The primary function of the Ultrasound Program in PCH is to teach healthcare workers how to image various aspects of the human body so proper diagnoses can be made, leading to the right care of our patients. Ultrasound is a non-invasive procedure that uses sound waves to quickly help diagnose a patient. It encompasses OB/GYN, FAST, small parts, vascular, echocardiography and abdomen. Healthcare workers well-trained in these areas can use the knowledge they have received to better serve their patients.*

It is PCH's sole purpose to teach healthcare workers ultrasound, so they can share and apply their knowledge and skills to save lives. The anticipation for our arrival and the joy we see on the participants faces after gaining the knowledge is what makes us keep going back to Haiti to share all we can to improve the lives of the community.

-Catherine Voltaire, US Course Director

Thank you to all of our 2019 donors.
